

7S_OPT_TCH_Contemporary Trends in Design

Qualification: Degree in Higher Artistic Education in Design in the specialties of graphic design, interior design, fashion design and product design.

Subject: Electives in theory, criticism and humanities

Type: Training Optional

Credits: 4 ECTS

Total hours: 100h

Course: 4

Hours/week: 6.3 hours

Semester: 7

Face-to-face hours/week: 2.5h

Language in which it is taught: Catalan / Spanish

Self-employed hours/week: 3.8h

Prerequisites:

1. Presentation of the subject

The subject aims to offer an overview of some of the current trends in the world of design and, at the same time, aims to stimulate reflection and a critical vision on the part of students in relation to the various possibilities that, as a designer, can be worked on from their personal point of view, taking into account the historical, social and cultural environment.

2. Course contents

Designing futures: Critical Design, Fictional and Speculative Design.

New technologies applied to design:

- Innovation in manufacturing.
- Innovation in materials.
- Tools to help with design: Parametric Design or Algorithmic Design and Generative Design.
- Augmented reality and virtual reality.

3. Skills worked on in the subject (Real Decret 633/2010)

Transversal skills		Subject	Subject
CT-02	Collect significant information, analyze it, synthesize it and manage it appropriately.	X	X
CT-08	Develop ideas and arguments in a reasoned and critical manner.	X	X

General skills		Subject	Subject
CG-06	Promote knowledge of the historical, ethical, social and cultural aspects of design.	X	X

Non-Catalan versions of this document are translated using Google Translate, which automatically translates the published text. The translation is not reviewed and may contain errors.

This document may be obsolete once printed.

7S_OPT_TCH_Contemporary Trends in Design

Printed 2026-4-7

1

Guia Docent del Grau en Disseny

CG-09	Investigate the intangible and symbolic aspects that affect quality.	X	X
CG-12	Delve deeper into the history and tradition of arts and design.	X	X
CG-19	Demonstrate critical thinking skills and know how to propose research strategies.	X	X
CG-21	Mastering research methodology.	X	X

Specific skills in Graphic, Interior, Fashion and Product Design		Subject	Subject
GRA-15	Reflect on the positive social influence of design, assess its impact on improving the quality of life and the environment and its capacity to generate identity, innovation and quality in production.	X	X
INT-15	Reflect on the positive social influence of design, assess its impact on improving the quality of life and the environment and its capacity to generate identity, innovation and quality in production.	X	X
MOD-15	Reflect on the positive social influence of design, assess its impact on improving the quality of life and the environment and its capacity to generate identity, innovation and quality in production.	X	X
PRO-15	Reflect on the positive social influence of design, assess its impact on improving the quality of life and the environment and its capacity to generate identity, innovation and quality in production.	X	X

4. Learning outcomes

RA	Description of the learning outcome	Skills
RA1	Demonstrate analytical and systematic criteria to develop arguments and/or ideas.	CT-08, CG-06,
RA2	Know historical and/or aesthetic and/or ethical and/or social and/or cultural aspects taught in the subject.	CG-12
RA3	Establish historical, aesthetic, ethical, social or cultural relationships with the context.	CG-09, CG-12
RA4	Develop reflective and critically argued speeches based on the fact of designing.	CG-19, GRA-15, INT-15, MOD-15, PRO-15
RA5	Develop research and innovation strategies.	CG-19, CG-21

5. Teaching methodologies of the subject

Code	Typology	Description	Apply
MD1	Conference and/or master class	The teacher presents and transmits knowledge to the entire group of students, the student has a passive role, that of a receiver.	x
MD2	Debate and/or discussion	The teacher encourages and moderates debates and/or discussions that promote reflection, critical thinking and active participation of students in the classroom.	x
MD3	Readings and/or comments	Use of selected texts or materials as a starting point to promote reflection, critical understanding and debate among students.	x

Non-Catalan versions of this document are translated using Google Translate, which automatically translates the published text. The translation is not reviewed and may contain errors.

This document may be obsolete once printed.

7S_OPT_TCH_Contemporary Trends in Design

Printed 2026-4-7

2

Guia Docent del Grau en Disseny

MD4	Tests and/or exams	Formal and structured activity to collect evidence on the degree of achievement of knowledge, skills or competencies by students. This can be written, oral or practical and includes a variety of formats: questionnaires, problems, open questions, practical exercises, etc.	x
MD5	Workshops and/or internships	Carrying out practical activities applied in a controlled environment, oriented towards learning through experience and/or the transfer of theoretical knowledge to real or simulated situations.	x
MD6	Presentations and/or defenses	Publicly presenting the results of a work, project or research in front of an audience.	x
MD7	Case study	Analysis of situations or problems within the specialty with the aim of reflecting, analyzing and discussing different intervention or solution proposals through examples or references.	x
MD8	Project work	Project or problem based on the real or professional world that needs to be solved independently or in a group.	x
MD9	Guided practice	The teacher presents and transmits theoretical knowledge applied to practical activities that take place in the classroom. The teacher guides, supervises and gives active feedback during the practice.	x
MD10	Flipped classroom	Transfer part of the theoretical learning outside the classroom, through online materials or resources prepared by the teacher, to dedicate face-to-face time to practical, participatory activities and knowledge application.	x
MD11	Collaborative work	Joint construction of knowledge through interaction and collaboration between students. The teacher has a guiding and dynamizing role.	x
MD12	Agile methodologies	Type of teamwork in which work is carried out in several short periods of time.	x
MD13	Role-playing games	Role play with the aim of illustrating a situation and the different points of view on it.	x
MD14	Others		

6. Training activities of the subject

Code	Description	Duration	Percentage
AF1	Essay and presentation in class	4 weeks	20-30%
AF2	Research and critical essay individual	4 weeks	20-30%
AF3	Reading and individual critical essay	8 weeks	30-40%

7. Evaluation systems

Due to their typology and educational program, all subjects in the ESDAPC undergraduate design studies include continuous assessment as a procedure to regulate and qualify the learning achieved by students during the semester.

Non-Catalan versions of this document are translated using Google Translate, which automatically translates the published text. The translation is not reviewed and may contain errors.

This document may be obsolete once printed.

3

Guia Docent del Grau en Disseny

In the event of not achieving the level of sufficiency in the evaluation activities within the closing milestones set out in the subject's schedule, the activities not passed may be corrected and/or completed within the recovery procedure defined by the teaching staff in their schedule.

7.1. Continuous evaluation

General evaluation criteria

The ESDAPC sets some **general evaluation criteria** which are common to all teaching guides, without prejudice to the specific evaluation and grading criteria of each subject:

- Subject grading: A weighted average of the grades obtained in each of the training activities will be made in accordance with the percentages described in the teaching guide and classroom schedule. The subject will be passed with a grade of 5.0 (Pass). All assessment activities can be corrected and/or completed within the recovery procedure within the continuous assessment that the teaching staff defines in their classroom schedule.
- Class attendance is essential in order to guarantee that learning is progressive, flexible and allows feedback and adjustments in its achievement within the continuous assessment. For this reason, class attendance is mandatory. The teaching staff establishes the mechanisms to control it. The student who does not attend a minimum of 80% of the face-to-face hours of the subject loses the right to continuous assessment and may present for remediation outside of the continuous assessment defined in the teaching guide and classroom schedule for the subject. In cases of serious absenteeism, with attendance of less than 60% of the face-to-face hours of the subject, the student will lose the right to be evaluated and will have a grade of "Not Presented".
- The ability to organize and plan tasks is part of the learning outcomes that the student must achieve within the training process, therefore the deliverables of the evaluation activities must conform to the deadlines, the format and contents defined in the activity statement in order to be qualified. Activities submitted after the deadline, format and/or minimum content will be considered outside the continuous assessment process, will not be evaluated within it and may be resubmitted as a retake.
- In the event of a submission or exam coinciding with a force majeure situation, the student may request to submit an activity after the deadline or repeat an exam, without being considered out of continuous assessment. This submission or exam will be carried out according to the conditions and calendar determined by the teaching staff.
 - Force majeure is understood to mean: serious illness or temporary incapacity (hospitalization) of the student or a first-degree relative, coincidence with an official language level or driving license exam, inexcusable duties before the administration or death of a first- or second-degree relative. It must be requested in an argued and justified manner in the form of [generic application](#), addressed to the campus management,

Guia Docent del Grau en Disseny

and must necessarily include the original with a stamp of the document proving the major cause alleged.

- The evaluation process is based on the student's personal work and presupposes the authenticity of the authorship and originality of the exercises carried out. Any act of copying and/or plagiarism or irregular use of Artificial Intelligence (AI) will result in the immediate and irrevocable suspension of the assessable activity, without the right to recovery.

However, and without contradicting these general criteria, each teacher may define other specific complementary conditions, which are included in this teaching guide.

These complementary conditions cannot in any case result in a penalty or limitation of the qualification of an activity, nor the loss of the right to recover an activity.

Specific evaluation criteria within continuous evaluation

Documentation (35-45%)

Makes good use of sources of information (bibliography and APA citations). Shows critical reflection on the topic.

It delves into the historical, creative, aesthetic, ethical, social or cultural relationships with the context. It carefully applies the proposed methodology.

Critical essay: (40-55%)

Ideate and/or make a coherent proposal.

Shows the ability to generate, evaluate, question and/or judge concepts and ideas. Shows written and oral expression in form and content.

Shows good writing and correct use of language and relevant terminology. Demonstrates the ability to generate, evaluate, question and/or judge concepts and ideas.

Exposure. (0-25%)

Has the capacity for contextual analysis and relevant communicative resolution.

Prepare a coherent speech following the established guidelines.

Shows written and oral expression in form and content.

Written test / text commentary Shows critical reflection on the topic.

It delves into the historical, creative, aesthetic, ethical, social or cultural relationships with the context. It carefully applies the proposed methodology.

Ideate and/or make a coherent proposal.

Shows the ability to generate, evaluate, question and/or judge concepts and ideas. Shows written and oral expression in form and content.

Demonstrates good writing and correct use of language and relevant terminology.

Demonstrates the ability to generate, evaluate, question and/or judge concepts and ideas.

Has the capacity for contextual analysis and relevant communicative resolution.

Prepare a coherent speech following the established guidelines.

Shows written and oral expression in form and content.

Guia Docent del Grau en Disseny

Evaluation instruments within continuous evaluation

Rubrics.
Written/practical tests
Questionnaires.
Application exercises.
Individual and/or group feedback: written or oral.
Monitoring reports.
Direct observations.
Observation records.
Self-assessment.
Co-evaluation.

7.2. Recovery

General recovery criteria

The ESDAPC sets general recovery criteria that are common to all teaching guides, without prejudice to the specific evaluation and grading criteria of each subject:

- The ESDAPC provides for a single recovery per activity. The recovery of suspended activities will be done within the deadlines defined by the teachers in their classroom schedule within the same semester. In the event that the teachers have not established a recovery calendar, students may submit the recovery activities during the last school week of the semester.

Specific recovery criteria within continuous assessment

The same criteria as in the continuous assessment.

Specific recovery criteria outside of continuous assessment

Recovery will take place in the last week (17th) for those who have a percentage of absences between 60% and 80% or do not comply with the conditions of format, content and delivery deadline, they will also have to recover the activities outside of the continuous assessment.

The submission will consist of presenting the activity/s of the original statement and taking an exam.

Subject recovery instruments outside of continuous assessment

Written/practical tests
Questionnaires.
Complementary exercises / extension activities.

8. Educational care within the framework of an inclusive education system

This Teaching Guide takes into account educational care within the framework of an inclusive educational system that includes two reference frames that support it:

Guia Docent del Grau en Disseny

- MISU: Universal Measures and Supports to promote personal and social development in equity and equality.
- DUA: Universal Learning Design, which allows flexible learning situations to be created based on a design that detects and minimizes the barriers of the context, from the beginning, and that considers variability.

However, to ensure freedom of thought and opportunities in relation to the gender perspective, a co-educational dynamic is carried out that avoids the predisposition of differential treatment, role attributions or assumptions of abilities determined by gender.

The MISU and DUA will be applied to all ESDAPC students. Those students in need of additional measures and support will be included through an Individualized Support Plan.

9. Copying, plagiarism, and academic honesty

From a legal point of view, plagiarism is an infringement of copyright.

The ESDAPC NOFC describes in section 5.4 irregular conduct in the evaluation procedure, which includes copying or plagiarism in any academic activity.

10. Use of Artificial Intelligence (AI)

The ESDAPC recognizes the value of Artificial Intelligence (AI) in the educational field, while highlighting the risks it entails if it is not used ethically, critically and responsibly. The use of AI in the teaching and evaluation context is governed by the principles, criteria and recommendations established in the ESDAPC Guide to the Ethical and Responsible Use of Artificial Intelligence, which constitutes the institutional reference document in this matter.

In this sense, in each assessment activity, students will be informed about the AI tools and resources that can be used and under what conditions, recommending their use as an assistance tool during the research, analysis or conceptual exploration process, but not as a replacement for their own work or professional judgment.

For their part, students undertake to follow the instructions of the ESDAPC when carrying out the assessment activities, as well as the criteria included in the Guide for the Ethical and Responsible Use of AI. Within this framework, students must transparently cite the AI tools used and explicitly identify texts, images or other content generated with AI systems, which may not be presented as their own production.

Misuse of Artificial Intelligence can seriously affect the evaluation of assessment activities. In case of doubt, it is recommended that students consult the teacher responsible for the subject before submitting.

The specifics of the use of Artificial Intelligence in each subject—including the authorized tools, conditions of use and associated evaluation criteria— will be defined in the classroom schedule, where teachers will contextualize the Teaching Guide and the Guide for the Ethical and Responsible Use of AI based on the objectives, skills and methodologies of the subject.

Guia Docent del Grau en Disseny

In all cases, students are responsible for any possible errors, omissions or biases that may be generated by the Artificial Intelligence used in the work process.

12. Training activity sheets

ACTIVITY 1	Duration: 4-5 weeks	Weighting: 20-30%
Description of the activity		
Theoretical activity (critical essay type) individual or in group (determined by the teacher)		
Contents		
Designing futures: Critical Design, Fictional and Speculative Design.		
Skills		
CG-06	Promote knowledge of the historical, ethical, social and cultural aspects of design.	
CG-09	Investigate the intangible and symbolic aspects that affect quality.	
CG-12	Delve deeper into the history and tradition of arts and design.	
CG-19	Demonstrate critical thinking skills and know how to propose research strategies.	
CG-21	Mastering research methodology.	
Applied teaching methodologies		
MD1	Master classes.	
MD14	Visualization and analysis of images, graphic material, documentaries and/or films.	
	Sample research work models, web sources and examples of timelines.	
Learning outcomes		
RA1	Demonstrate analytical and systematic criteria to develop arguments and/or ideas.	
RA2	Know historical and/or aesthetic and/or ethical and/or social and/or cultural aspects taught in the subject.	
RA3	Establish historical, aesthetic, ethical, social or cultural relationships with the context.	
RA4	Develop reflective and critically argued speeches based on the fact of designing.	
RA5	Develop research and innovation strategies.	
Continuous evaluation		
Specific evaluation criteria within continuous evaluation		
Devise and/or carry out a coherent proposal. Rich content.		
Show the ability to generate, evaluate, question and/or judge concepts and ideas.		
Capability for contextual analysis and relevant communicative resolution.		
Careful application of the proposed methodology.		
To delve deeper into the historical, creative, aesthetic, ethical, social or cultural relationships with the context.		
Good writing and correct use of language and relevant terminology.		
Good use of information sources (bibliography and APA citations).
